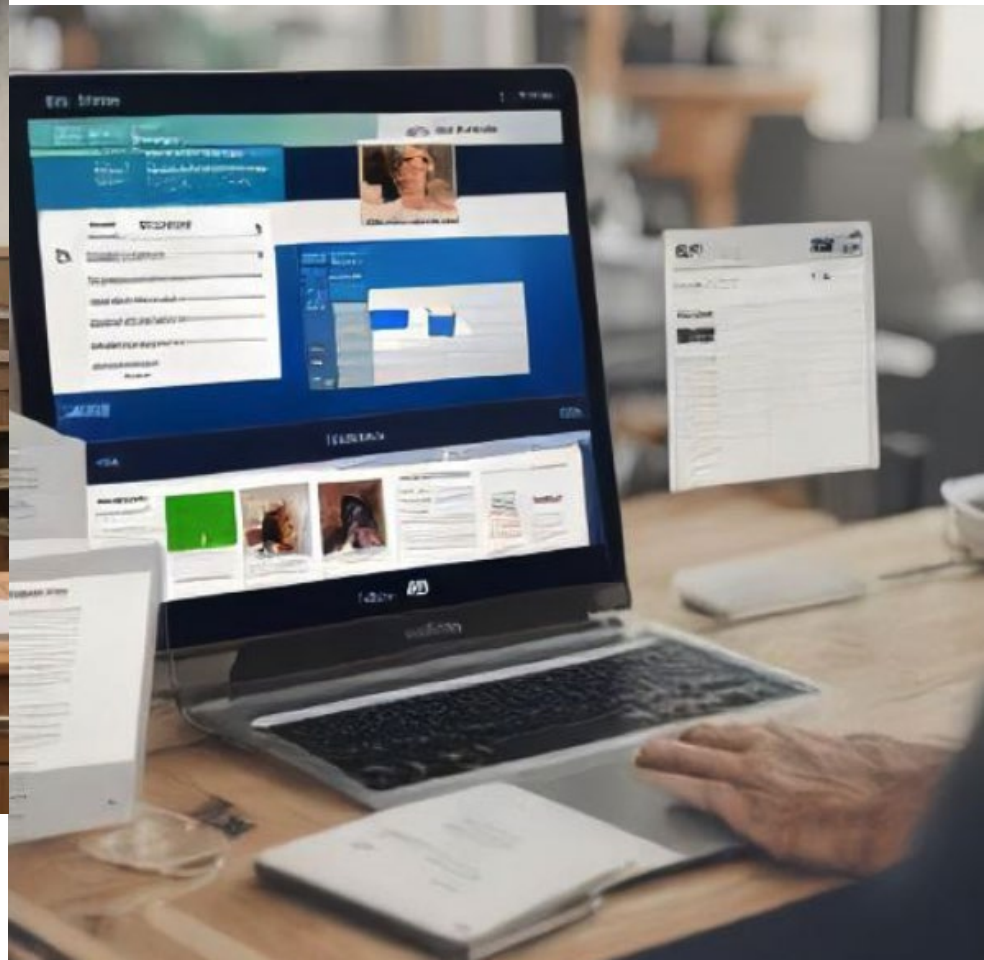
How can AgTech help?

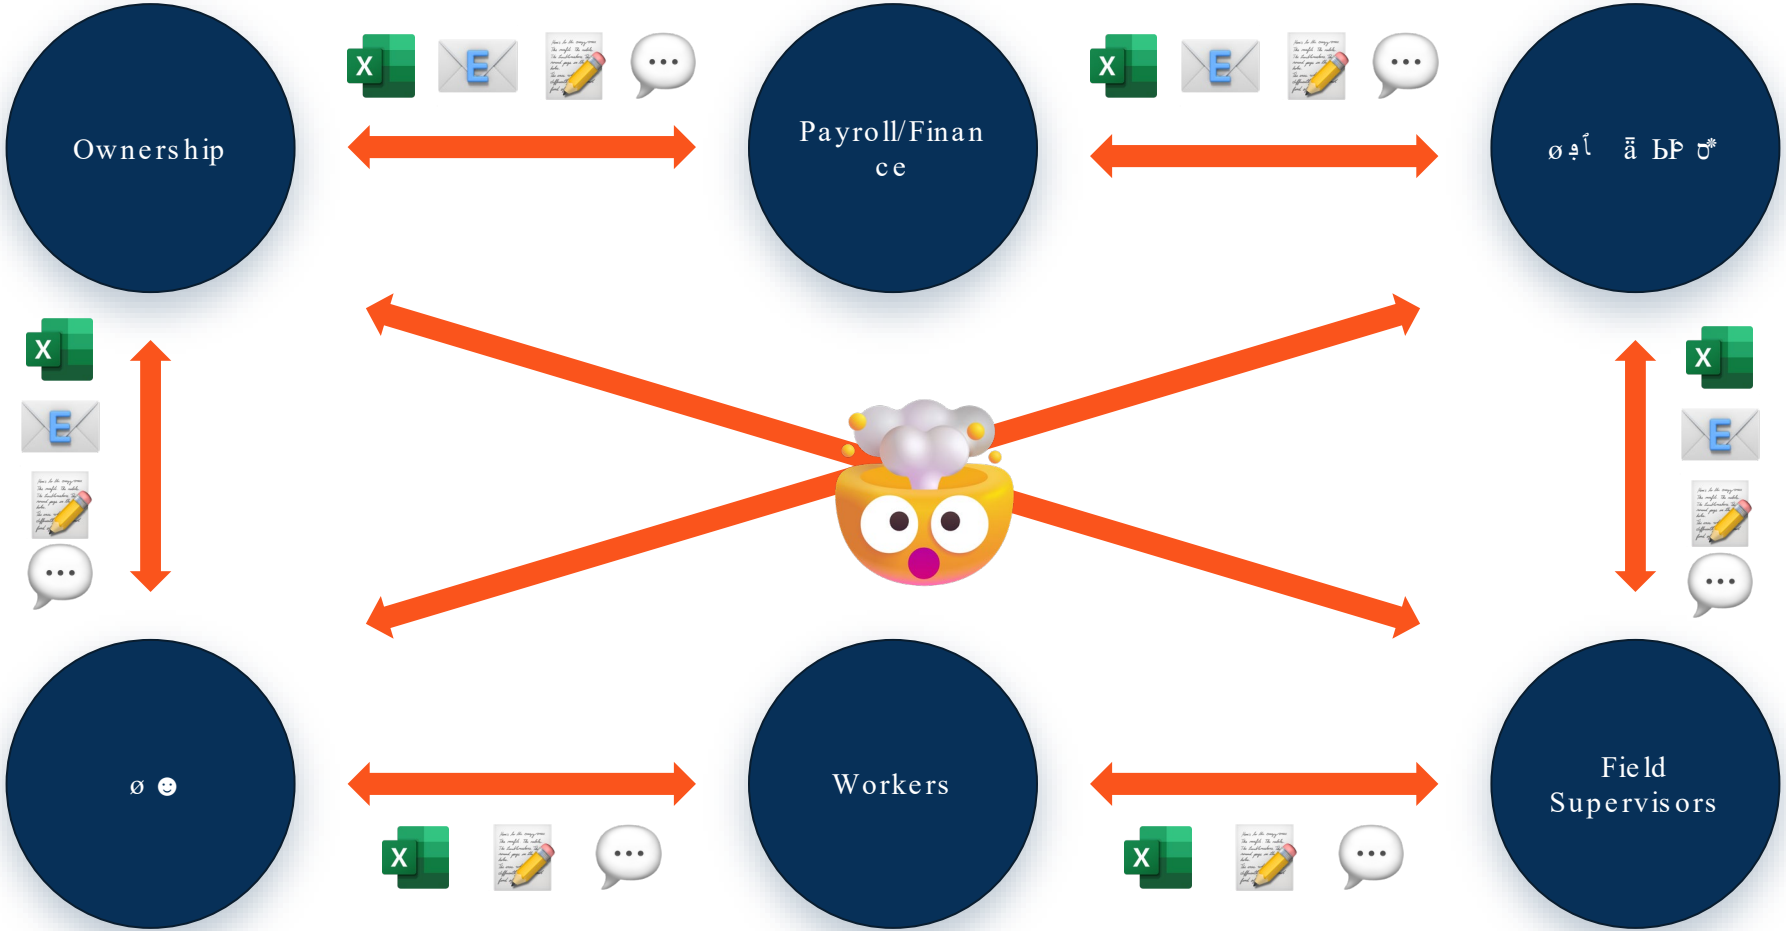
Save time & money managing back office

Ensure a happy, reliable workforce

Get you back out in the orchards!

Disconnected Software





Ownership
Payroll/Finance
ø ☻
Workers
Field Supervisors

Why does this matter?

- **Compliance and Audit -ready:** scrambling to find files from disparate sources
- **Error reduction:** reduce “fat finger” errors
- **Reduce double entry:** imagine if after you onboarded a worker, you didn’t have to then set them up in systems
- **Workforce productivity & morale:** data in one place means payroll, HR, and H -2A administration working from the same source of truth
- **Reduce worker frustration & confusion:** Inefficient employee onboarding/offboarding and payroll process

Vision:

Seso Employee Management System

Seso is the single system of employee data powering or propagating employee data to key back office workflows

HR & Digital Worker Onboarding = Save Time & Paper
